YOU'RE INVITED

ELIMINATE THE PAIN OF PID

1 Day Training Class 9AM - 2PM

April 14 - Cranberry, PA
April 16 - Streesboro, OH
April 21 - Erie, PA

JOIN US

AGENDA - 1 DAY TRAINING CLASS

9:00 AM - 2:00 PM

- Introduction to InTAC
 - Process Control
 - Motion Control
- Overview of the InTAC suite
 - System Identification
 - Control
 - Trajectory generation & motion planning
- Performance metrics
- Demonstration
- Case Studies
- Q&A

ELIMINATE THE PAIN OF PID

InTAC is a control suite that replaces PID and provides high-performance, low maintenance and easy-to-use control for industrial systems. InTAC is designed to control First-order Plus Dead Time (FOPDT) systems and second-order motion systems.

The InTAC 1 Day Control Workshop, based on SIEMENS TIA Portal, PCS7, and Simotion, will give participants exposure to the InTAC library of function blocks. Participants will discover how InTAC can improve performance, simplify commissioning, and reduce maintenance.

The workshop features demonstrations, performance metrics, and case studies. All workshop attendees will receive a free, time-based trial of the InTAC function blocks.

WHO SHOULD ATTEND:

- Plant Managers
- Control Engineers
- Motion System Engineers
- OEM Designers
- Anyone interested in process, speed, or position control applications

APPLICATION EXAMPLES

- Production Machinery Control
- Medical Equipment
- Robotics
- Temperature
- Level
- Flow

LIMITED TIME OFFER

Workshop attendees will receive a free, time-based trial of the InTAC function blocks!
