

SETTING YOU UP FOR SUCCESS

Banner Wireless

1 **Consult with ACD/Adcon Engineering for pre-sales support:** Determine the scope of the application

Utilize ACD/Adcon Engineering Support

Check if the application is a good fit for wireless

Look through sensors available

[Click Here](#)

Determine which wireless structure will work best for you

- Premapped
 - Star Topology
 - MultiHop
-

2 **Get a Site Survey**

Find mounting positions for each node

Contact local account manager to setup a time to walk through each location

- Depending on location, a high gain antenna may be needed
-

3 **Determine the hardware requirements:**

Will a solutions kit work?

[Click Here](#)

How many nodes are in the system?

Which gateway will you need?

- Does it need to speak over ethernet?
 - Does it need inputs/outputs?
-

Will this system need an enclosure?

- What accessories will you need to get wireless communications out?

4 Learn the basics of the system:

Learn to bind the nodes to the gateway

Learn to read the signal strength of each node

5 Learn the basics of the software:

See the different way to program each gateway

- Scripting
 - Banner's register shifting
-

Learn how to establish communications to another system
